Subject: Prepping for talking pts on Riparian Rule
Attachments: Riparian Rule Talking Pts 5.17.14.docx

Hi Everyone, I talked with Alan about getting draft talking points from the group on the Riparian Rule. Given the EQC and BOF June meeting dates, I'm proposing we get a decent set of draft talking points by next Wednesday, May 28. To get us started, I've put together the topic areas that I think we need Talking Points for along with a first cut at who probably are the right folks to work on it.

Topics:

1. Importance of Protecting Cold Water: Temperature Guidance (*John, Dru, NOAA, others*)
2. Environmental Benefits to Riparian Rule (*All*)
3. Riparian Rule and CWA (*Rochelle, Jenny, Alan, Others*)
4. Riparian Rule and CZARA (*Alan, Jenny, Others*)
5. Where Riparian Rules Apply (*Rochelle, Jenny, Alan, Others*)
6. RipStream and Paired Watershed Study (*Peter, All*)
7. Additional Rulemaking for Type N, eastside streams or other areas outside the scope of the Riparian Rule (*All? Alan?*)

Attached is a working document that you can insert your talking points into. I also put some explanation of some ideas on the overall plan on how your piece might fit into it for what it's worth. I'll be by to talk with Dru and John especially on the temp guidance as that's likely to be the most important part of the talking points. Enjoy, and let Alan or me know if you have questions, and edit at will on the attachment. We're tag-teaming this one along with heavy lifting from everyone on this email!
